ACIMGA's Rotogravure Group, responding to an action Item assigned to Carlo Carnelli as an Italian expert, has produced a proposed Title, purpose and index to be presented at the next ISO/TC130 meeting in November with the intention of starting the work to have a new standard of the 12647 family for rotogravure packaging

Proposed draft title and scope

Title

Graphic technology – Process control for the production of half-tone colour separations, proofs and production prints– Part X: Packaging Rotogravure printing

Scope

This part of ISO 12647 document specifies the requirements for the exchange of data and information necessary for the definition of the aims for process and spot colour gravure printing of packaging materials. It is based on the use of colour characterization data to define the colourimetric printing aims and includes appropriate assignment of responsibility for and recommended tolerances on critical parameters of the Rotogravure printing process.
